

ArgiMent®

Advanced Therapy for Staged Wounds

Orange Flavor

- High nitrogen formula

FEATURES AND SPECIFICATIONS

Kcal/mL..... 0.58

When mixed in 240 mL of water

Caloric Distribution (% of kcal)

Protein..... 81%
Carbohydrate..... 19%
Fat..... 0%

Protein Source:

L-arginine (14.25 N2 Eq)
L-glutamine (12.0 N2 Eq)

HCPCS Code: B4155

Appropriate for these diets:

Lactose Free, Gluten Free, Low Residue,
Carbohydrate Controlled, Low Fat

Phenylketonurics: contains Phenylalanine

Can be used orally or through feeding tube.

Shelf Life: 24 months

Each serving contains:

7.5 g L-arginine
10 g L-glutamine

The amount of nitrogen in one packet of ArgiMent is equivalent to 26 g of intact protein.

Not for use by patients suffering from dehydration, compromised renal functions or liver disease.

Glutamine is contraindicated in liver disease and should not be given to patients in shock or who have multi-organ failure.

Not for individuals with galactosemia.

Not a sole source of nutrition.

A Medical Food

Use under medical supervision.

NOT FOR PARENTERAL USE

Since L-glutamine is unstable after being mixed with in a liquid, it is important to administer immediately after mixing to ensure full potency.

FOR THE DIETARY MANAGEMENT OF WOUND HEALING

ArgiMent® is specifically formulated to provide arginine and glutamine for the dietary management of pressure injury and surgical wounds.^{1,2,3,4,5} During periods of metabolic stress from illness, wounds or surgery, a balanced diet may not provide adequate amounts of critical nutrients known as “conditionally essential nutrients” needed for healing. ArgiMent provides the highest levels of two key conditionally essential amino acids involved in healing:

Arginine: Promotes blood flow throughout the body, delivering nutrients and oxygen to support tissue healing.

- Joins with other nutrients to form collagen protein required for tissue repair.

Glutamine: Acts as fuel for rapidly proliferating cells, helping to maintain gut integrity, and thus promotes nutrient absorption.

- Stimulates the synthesis of muscle tissue and inhibits the degradation of proteins, thus preserving lean muscle mass required for healing.

Dosing and Administration

Oral: Mix one packet with 180-240 mL water or juice BID (two servings per day).

Tube Feeding: Mix one packet with 60 mL of water. Stir until completely dissolved. Infuse via syringe down feeding tube. Flush tube with 30 mL water before and after administration. Do not mix with tube feeding.

Note: Products containing glutamine are to be consumed or administered immediately upon mixing to insure maximum potency.

One packet of ArgiMent contains the nitrogen equivalent of 26 g of intact protein.

Ingredients: L-Glutamine, L-Arginine, Orange Juice Powder, Citric Acid, Fructose, Orange Flavor, Aspartame, Yellow 6
