THICKENED DAIRY FOR DYSPHAGIA

Convenient 4 fl. oz. serving

Café Thickened Dairy™ milk meets the consistency needs of your residents, eliminates waste and reduces cost because it tastes better and comes in a 4 fl oz serving size. Café Thickened Dairy milk undergoes pasteurization then is flash frozen to retain its fresh milk taste and appearance. It's a refreshing change from shelf stable aseptically processed milk which has a cooked taste and an off-white appearance. Café Thickened Dairy milk looks and tastes just like fresh milk and comes in a serving size that just makes a lot more sense!

Made from real 2% reduced fat milk that has been fortified with Vitamins A and D, Café Thickened Dairy milk delivers 10% of the RDA for Vitamin A and 24% of the RDA for Vitamin D. For more information please visit our website: www.medtrition.com.
